

Newest Engineering Firm is Growing!

We conceived our reservoir engineering firm on the premise that *Knowledge + Experience = Value*. We've built Graves & Co. Consulting on the belief that it shouldn't cost an arm and a leg to obtain reliable, trustworthy reserves evaluations.

In our first 24 months, we've grown to 33 clients and worked on projects from Appalachia to Argentina. Our clients include public and private E&P companies, banks, private equity firms, metropolitan taxing authorities, royalty trusts and mineral owners.

"Thank you for all of your work in preparing this report. You guys were great to work with."

-Sean McClaren

Lincoln Energy Partners, LLC

We're Growing!

Year-end reserve reports have made up the bulk of our work, followed by the certification of reserves for overseas projects, reports to banks and acquisition analyses, field development studies, reserve reports to taxing authorities, and mineral asset valuations.

Clients interested in significant cost-savings utilize our services on an outsourced basis – we're there when they need us and not when they don't. We're proud to be helping our clients save money at a time when the pressure is on to cut costs and boost the bottom line.

We're Hiring

We are looking for an experienced reservoir engineer to join our team. The successful candidate will perform evaluation of properties, fields, and reservoirs to estimate recoverable hydrocarbon volumes, classify reserves or resources, and communicate those results through verbal and written reporting. Interested? Submit your resume to info@gravesconsulting.us.

Thank you to everyone who came by to see us!

Summer NAPE

What a wonderful time we had reconnecting, networking, and learning about potential projects.

We enjoyed catching up with long-time acquaintances, meeting new people and landing some new opportunities!
